ECONOMIC DEVELOPMENT
AND TRADE

Office of the Minister

407 Legislature Building, Edmonton, Alberta, Canada T5K 2B6 403/427-2134

December 1986

Dear Readers:

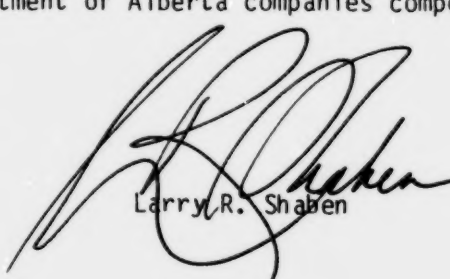

International trade is the lifeblood of Alberta. Last year, our total exports reached \$13.4 billion, or nearly one-quarter of this province's economic activity.

Alberta's export figures are increasing dramatically. In only 10 years, we have seen a three-fold increase in exports -- goods and services going to 120 countries around the globe.

The United States is Alberta's largest trading partner. In 1985, about \$10.5 billion, three-quarters of the province's exports, went to our southern neighbor. Alberta also shipped over \$100 million of goods to Japan, the People's Republic of China, the U.S.S.R., Brazil, South Korea, India and Morocco.

Exports mean the world to us. They create jobs and improve our standard of living. For all of us, exports keep the wheels of progress and industry moving -- not only in the traditional resource sectors, but in manufacturing, applied technology and processed foods.

"Country Profiles 1985" documents the strong contribution Alberta exporters make to revitalize and diversify the economy. Indeed, we salute the drive, energy and commitment of Alberta companies competing in the global marketplace.

Larry R. Shaben

ALBERTA TRADE
COUNTRY PROFILES 1985

NOVEMBER 1986
ALBERTA ECONOMIC DEVELOPMENT AND TRADE

INTERNATIONAL TRADE: COUNTRY PROFILES 1985

Alberta has strong capabilities in traditional resources, manufacturing and applied technology and its production often exceeds domestic requirements for goods and services. Such an abundance has led many Albertans to reach beyond Canadian borders to explore markets around the globe, often with great success.

Export trade is an important component of the Alberta economy. It represents, on average, one-quarter of Alberta's gross provincial product. In 1985, the exports of Alberta merchandise were valued at \$13.4 billion, an 8.3 per cent increase over the \$12.4 billion in 1984. Alberta's exports have been shipped to all parts of the world. In all, Alberta's exports went to 120 countries last year.

The most important market for Alberta, in dollar terms, is the United States. About 75 per cent, \$10.5 billion in 1985, of Alberta's exports are destined there. The Pacific Rim/Asia is the second largest market for Alberta goods and one of the most promising. In 1985, Alberta's exports to that market increased by just over 21 per cent to \$1.7 billion. Among individual countries, the largest markets are the United States, Japan, the People's Republic of China, the USSR and Brazil.

The following is a ranking by country of some of Alberta's major export destinations:

Country	\$' Million	
	1984	1985
United States of America	9,359.0	10,505.8
Japan	735.1	789.2
China, People's Republic of	189.8	299.0
U.S.S.R	544.0	258.2
Brazil	167.6	175.3
Republic of Korea (South)	99.1	167.6
India	96.2	107.1
Morocco	14.4	101.4
Taiwan	80.7	84.1
Indonesia	41.5	77.3
Tunisia	40.6	67.5
South Africa	42.6	65.2
Australia	44.9	59.2
Belgium-Luxembourg	87.8	57.7
United Kingdom	67.0	53.7

The trade profiles in this publication have been developed to provide a glimpse at Alberta's trade with its major trading partners (those receiving over \$1 million dollars in Alberta's goods). Each country profile depicts both Alberta and Canada's export and import trade with the country and includes a four year performance retrospective.

Technical Notes

The primary data source for this publication is Statistics Canada, the federal statistics agency. For reasons explained below, these figures have been augmented with Alberta Agriculture's estimates of Alberta's food and grain exports.

Prior to 1985, provincial exports were compiled on the basis of the origin of the "bill of lading". The bill of lading origin is the province in which goods destined for export are first placed on board a carrier. As a result, it is possible for significant quantities of an export commodity to leave a province (particularly a land-locked province) before they are actually exported.

From March 1985, at the directive of Canada Customs, exporters were required to declare the province of origin of goods being exported. Although this is a measure of improvement, Alberta's exports remain underestimated. Particularly significant are certain food and grain products. Alberta Agriculture's export estimates were used to supplement Statistics Canada data.

The import data is based on the province of clearance, the province in which the goods clear Customs Canada. Here, the land-locked position of Alberta results in many imports being excluded from provincial data. Overseas imports arriving at either the east or west coast are attributed to the port province. Even imports from the eastern United States often do not appear in Alberta's import total. Consequently, the Alberta import statistics should only be used as an indication of import activity and not as a true sum of provincial imports. The Canadian import data will serve as an accurate measure of imports from any given country.

The average annual percentage change calculation found at the bottom of each profile was calculated using a compound interest method.

Glossary

bbl.	volume in barrels (for petroleum, thirty-five gallons or forty-two United States gallons)
cwt.	weight in hundred weights of 100 lb. each
cwtad.	weight in hundred weights of 100 lb. each; air dried
doz.	number of dozens
doz. pr.	number of pairs in dozens
gal.	volume in Canadian gallons (one United States gallon = 0.83 Canadian Gallon)
lb.	weight in pounds
mbf.	volume in thousand board feet
mcf.	volume in thousand cubic feet
mt.	metric ton (tonnes) of 1,000 kg. or 2204.6 lbs. (one metric ton = 1.1 short tons)
nes.	not elsewhere specified
pr.	number of pairs
p. gal.	volume of alcoholic content in terms of Canadian gallons of the strength of proof (one United States p. gallon = 0.74 Canadian p. gallon)
sq. ft.	volume in square feet of 1/4" thickness, other thickness to be converted to the equivalent of 1/4" thickness (e.g. 10,000 sq.ft. of 1/8" plywood = 5,000 sq. ft. of 1/4" equivalent)
ton.	weight in short tons of 2,000 lb. (one short ton = 0.91 metric tons) (one short ton = 0.89 long tons)
